Art Unit: 1644

DETAILED ACTION

1. Applicant's amendments filed 10/17/03 and 8/21/01 are acknowledged and have been entered.
2. Applicant's election of Group III (claims 7-13), drawn to a method of modifying TALL-104 cells comprising culturing the cells in IL-15 in the response filed 10/17/03 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant's election with traverse of the species of cytokine profile of decreased expression of gamma interferon and the phenotype of increased expression of CD56 in the response filed 3/12/02 is acknowledged. The basis for the traversal is of record in the response filed 10/17/03. The Examiner hereby withdraws the restriction requirement for the species according to items #5 and 6 in the Restriction Requirement mailed 9/26/03.

Claims 7-10 and 12 are currently being examined.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 7-10 and 12 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is apparent that the cell line TALL-104 is required to practice the claimed invention. As a required element, it must be known and readily available to the public or obtainable by a repeatable method set forth in the specification. If it is not so obtainable or available, the enablement requirements of 35 USC 112, first paragraph, may be satisfied by a deposit of the pertinent cell line. See 37 CFR 1.801-1.809.

Although the instant specification discloses on page 1 at lines 16-21 that TALL-104 cells are available from ATCC under Accession No. CRL 11386 and are described in Patent No. 5,272,082 (not incorporated by reference into the instant specification), the following provisions have not been disclosed.

Art Unit: 1644

If the deposit was made under the provisions of the Budapest Treaty, filing of an affidavit or declaration by applicants, assignees or a statement by an attorney of record over his or her signature and registration number stating that the deposit has been made under the provisions of the Budapest Treaty and that all restrictions upon public access to the deposit will be irrevocably removed upon the grant of a patent on this application is required.

In addition to the conditions under the Budapest Treaty, applicant is required to satisfy that all restrictions imposed by the depositor on the availability to the public of the deposited material will be irrevocably removed upon the granting of a patent in U.S. patent applications.

If the deposit has not been made under the Budapest Treaty, then in order to certify that the deposit meets the criteria set forth in 37 C.F.R. 1.801-1.809, an affidavit or declaration by applicants or someone associated with the patent owner who is in a position to make such assurances, or a statement by an attorney of record over his or her signature, stating that the deposit has been made at an acceptable depository and that the following criteria have been met:

(A) during the pendency of this application, access to the invention will be afforded to the Commissioner upon request;

(B) all restrictions upon availability to the public will be irrevocably removed upon granting of the patent;

(C) the deposit will be maintained in a public depository for a period of 30 years after the date of deposit or 5 years after the last request for a sample or for the enforceable life of the patent whichever is longer;

(D) a viability statement in accordance with the provisions of 37 C.F.R. 1.807;

(E) the deposit will be replaced should it become necessary due to inviability, contamination, or loss of capability to function in the manner described in the specification.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 7-10 and 12 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1644

Claim 7 is indefinite in the recitation of "TALL-104 cells" because the characteristics of the said cells are not known. The use of " TALL-104" as the sole means of identifying the cells recited in the claimed method renders the claim indefinite because " TALL-104" is merely a laboratory designation which does not clearly define the said cells. It is suggested that Applicant amend the claim to recite "(ATCC CRL 11386)" after "TALL-104 cells"

7. No claim is allowed.
